DSX Hardware

Controllers and Communication Devices

DSX Intelligent Controllers are independent processing panels designed to be cost effective building blocks that allow expansion in a scalable manner. Each controller has a different combination of inputs, outputs and reader ports.

Each Controller operates as a fully intelligent and independent control panel that retains all data necessary for system operation in it's own RAM.

our
product
brand

DSX Access Systems, Inc.

is one of the most respected names in the security industry because of its concentration on providing products and service that exemplify Quality, Reliability and Integrity.

DSX Software

Access Control System and Integration Software

WinDSX is a powerful access control and system monitoring application that harnesses the power of the Windows 32 and 64 bit operating systems.

It combines point monitoring and access control with Photo ID Badging, Time and Attendance, Alarm Graphics, DVR/NVR Integration, Elevator Control, Alarm Email/Text Message Notification, Threat Level Management, HazMat and Emergency Lockdown, and FIPS/TWIC card
